

Math 342 - Term 1, Fall 2023

Algebra and Coding Theory

Instructor: Kalle Karu
Office: 213 Math Bldg
Phone: 822-4787
E-mail: karu@math.ubc.ca
Office hours: TBD.

Lectures: TuTh 12:30-2, Hennings building, room 202.

Textbook: *A First Course in Coding Theory* by R. Hill.

Web site: The Canvas course page will have more detailed information.

Course description. Math 342 is not about computer programming or writing computer code. Coding theory here means the theory of error correcting codes. This is the science of how to send data so that errors of transmission can be detected and corrected. We will use abstract algebra to construct and study good error correcting codes. It is a remarkable fact that highly abstract subjects such as algebra, number theory, algebraic geometry, which appear completely useless for real life problems, all have applications in coding theory.

A short list of topics: Error-correcting codes via abstract and linear algebra. Emphasis on proofs and computation. Finite fields, Hamming distance and error-correction, upper and lower bounds on the size of a code, linear codes, groups and cosets, encoding and decoding schemes.

Homework. We will have a homework roughly every week. Homeworks are posted on Canvas and you have to upload your solutions also to Canvas.

Exams. We will have two midterm exams, on Tuesdays, Oct. 17 and Nov. 21, during regular class hours. The final will be a $2\frac{1}{2}$ -hour exam scheduled by the university.

Final Grade. Your final grade will be based on your performance on homework (15%), midterms (35%) and final exam (50%).

University policies. UBC provides resources to support student learning and to maintain healthy lifestyles but recognizes that sometimes crises arise and so there are additional resources to access including those for survivors of sexual violence. UBC values respect

for the person and ideas of all members of the academic community. Harassment and discrimination are not tolerated nor is suppression of academic freedom. UBC provides appropriate accommodation for students with disabilities and for religious observances. UBC values academic honesty and students are expected to acknowledge the ideas generated by others and to uphold the highest academic standards in all of their actions. Details of the policies and how to access support are available on the UBC Senate website.
