

MATH 444: MATHEMATICAL RESEARCH AND WRITING

Assignment 7 Due Thursday March 3, 2022.

Richard Anstee

This assignment is more like a small progress report. It will be a group assignment. I want an outline of the project including some references that you have found. Some substantial details about the results you have encountered as well as the Mathematics you hope to explore. This can include actual theorems as well as proof techniques. I will give feedback relatively quickly. Perhaps two pages. It can refer to things not yet completed.
